JUNE 2022 CLIMATE OUTLOOK FOR SERBIA

Warm and dry June

June is anticipated to be warm with mean air temperature around +2°C above the multiannual average, ranging from 20°C to 23°C in the lowland, and from 12°C to 17°C in the hilly-mountainous regions. Mean maximum air temperature in June is expected to range from 24°C to 26°C in the lowland, and from 14°C to 20°C in the mountainous regions. Mean minimum air temperature is forecast to range from 11°C to 16°C and on the mountains from 5°C to 10°C. Number of summer days is predicted to range from 13 to 18 summer days, 16 days are forecast for Belgrade and up to 5 days on the mountains.

Below-average precipitation sums are expected in June across the entire country, in the lowland ranging from 50 to 70 mm, and on the mountains from 70 to 100 mm, locally even more due to expected convective development. Number of days with precipitation is predicted to range from 8 to 12 days in the lowland, and from 10 to 13 days in the hilly-mountainous regions.

Note: Climatological reference period is 1981-2010. Monthly climate outlook is produced once a month based on the available products of the monthly and seasonal forecast. More detailed forecast per week, for the following 30 days is updated on Friday and available on the following link:
